Sir:

In reply to the October 3, 2003 Office Action, the period for reply extended to February 3, 2004 by a Petition for Extension of Time filed herewith, reconsideration of the above-identified application is respectfully requested.

Claims 1-18 are pending in this application.

**I. The Claims Define Patentable Subject Matter**

The Office Action rejects claims 1-18 under 35 U.S.C. §102(b) as being anticipated by "Application of a Neural Network in Gas Turbine Control Sensor Fault Detection", Simani et al. (hereinafter "Simani"). The rejection is respectfully traversed.

Applicants' claim 1 relates to monitoring the health of a system by constructing a condition signature from a plurality of condition indicators including a plurality of vibration measurements acquired from the system or one or more vibration measurements in one or more performance parameter measurements acquired from the system, predicting a normal signature from a model defining one or more inter-dependencies between the condition indicators, the normal signature corresponding to a condition signature for a healthy system,
